55. PERU, CHILI, AND BUENOS AYRES.
56. BRAZIL.

ADVERTISEMENT.

THE great Utility of an UNIVERSAL ATLAS, on a scale sufficiently large for the purposes of general Reading, and not too inconvenient for the Study or the Table, is a Desideratum which must be obvious to every person who has been in the habit of following those great Events which have taken place on the Continent of Europe for several years past. These Considerations have induced the Publisher to undertake the present Work, which, he flatters himself, will be found to contain all the desired Information, at an easy Expense. Every attention has been paid to the Drawing of the Maps, which have been done from the best Authorities extant; and great care has been taken, in the Engraving, to render the objects clear and distinct, which, he trusts, will completely remove that universal complaint, the want of Perspicuity which generally pervades works of this description.

THE favourable Reception given by the Public to this ATLAS, has induced the Publisher to arrange and complete a CLASSICAL ATLAS, on the same Plan; which, he hopes, will not prove less deserving of its Acceptance, as he has not omitted any Exertion to render it equally correct, elegant, and useful.

Table

OF THE HEIGHTS AND LENGTHS

OF SOME OF THE PRINCIPAL MOUNTAINS AND RIVERS IN THE WORLD.

SELECTED FROM THE COMBINED VIEW OF MOUNTAINS AND RIVERS, LATELY PUBLISHED BY C. SMITH.

MOUNTAINS.

Name of Mountain	Situation	Feet above the Sea
